I measured three cars of stone today and they fall considerable short, measured them in presence of Kaybe & Brown, have written to Davis this evening and told him about measurement.

Enclosed find postal you note to Geo Cook which came back to the office. I traveled to Mr Kaybe's joint today & find that his foundation is 7 1/2 inches out of level, you might of heard some cursing if you had been around.

Send our love & try get as soon as you can Kaybe wants to hire it to set his water table had Brays today, but he sends his to Ottawa this week for a job he is doing there.

Hoping to hear from you soon
